Regional Meteorological Centre, Mumbai

Weather Ambassador

Here's your chance to be a weather ambassador and observe and report weather from your local place. You may be in a city, town or village and if you happen to observe a weather phenomenon like Rain, Thunder/ Lightning, Hailstorm, Dust storm or Fog you can report to us. India Meteorological Department allows users to make their own observations. This feature can be found from Public Observation section of Mausam website of IMD mausam.imd.gov.in. There is no need to register to send observations. User can report their observations along with their location and time of the event on the following weather phenomena such as **Rain, Thunder/lightning, Hailstorm, Dust storm, Fog** and the associated damage caused. User can share their location (latitude/longitude) by allowing the location through browser. Each phenomenon also includes additional information field that can be filled with free text. It is also possible to attach photos.

So just visit [https://city.imd.gov.in/citywx/crowd/enter th datag.php](https://city.imd.gov.in/citywx/crowd/enter_th_datag.php)

Looking forward for your active participation !!!
